Storage

A well planned modular kitchen  
is all about large amount of storage  
created in a small space

## Kitchen Collections

## U-Shaped

U-shaped modular kitchen is the best option, if there is enough available space in your kitchen. It covers all the three adjoining walls of the kitchen giving enough storage space and area to work around in the kitchen.

## L-Shaped

L-shaped kitchen occupies only two adjacent walls of the kitchen. A kitchen work triangle has three points with refrigerator, stove and sink at each point of the triangle which ensures minimum interference with work at three different working zones. The L-shaped layout is more open.

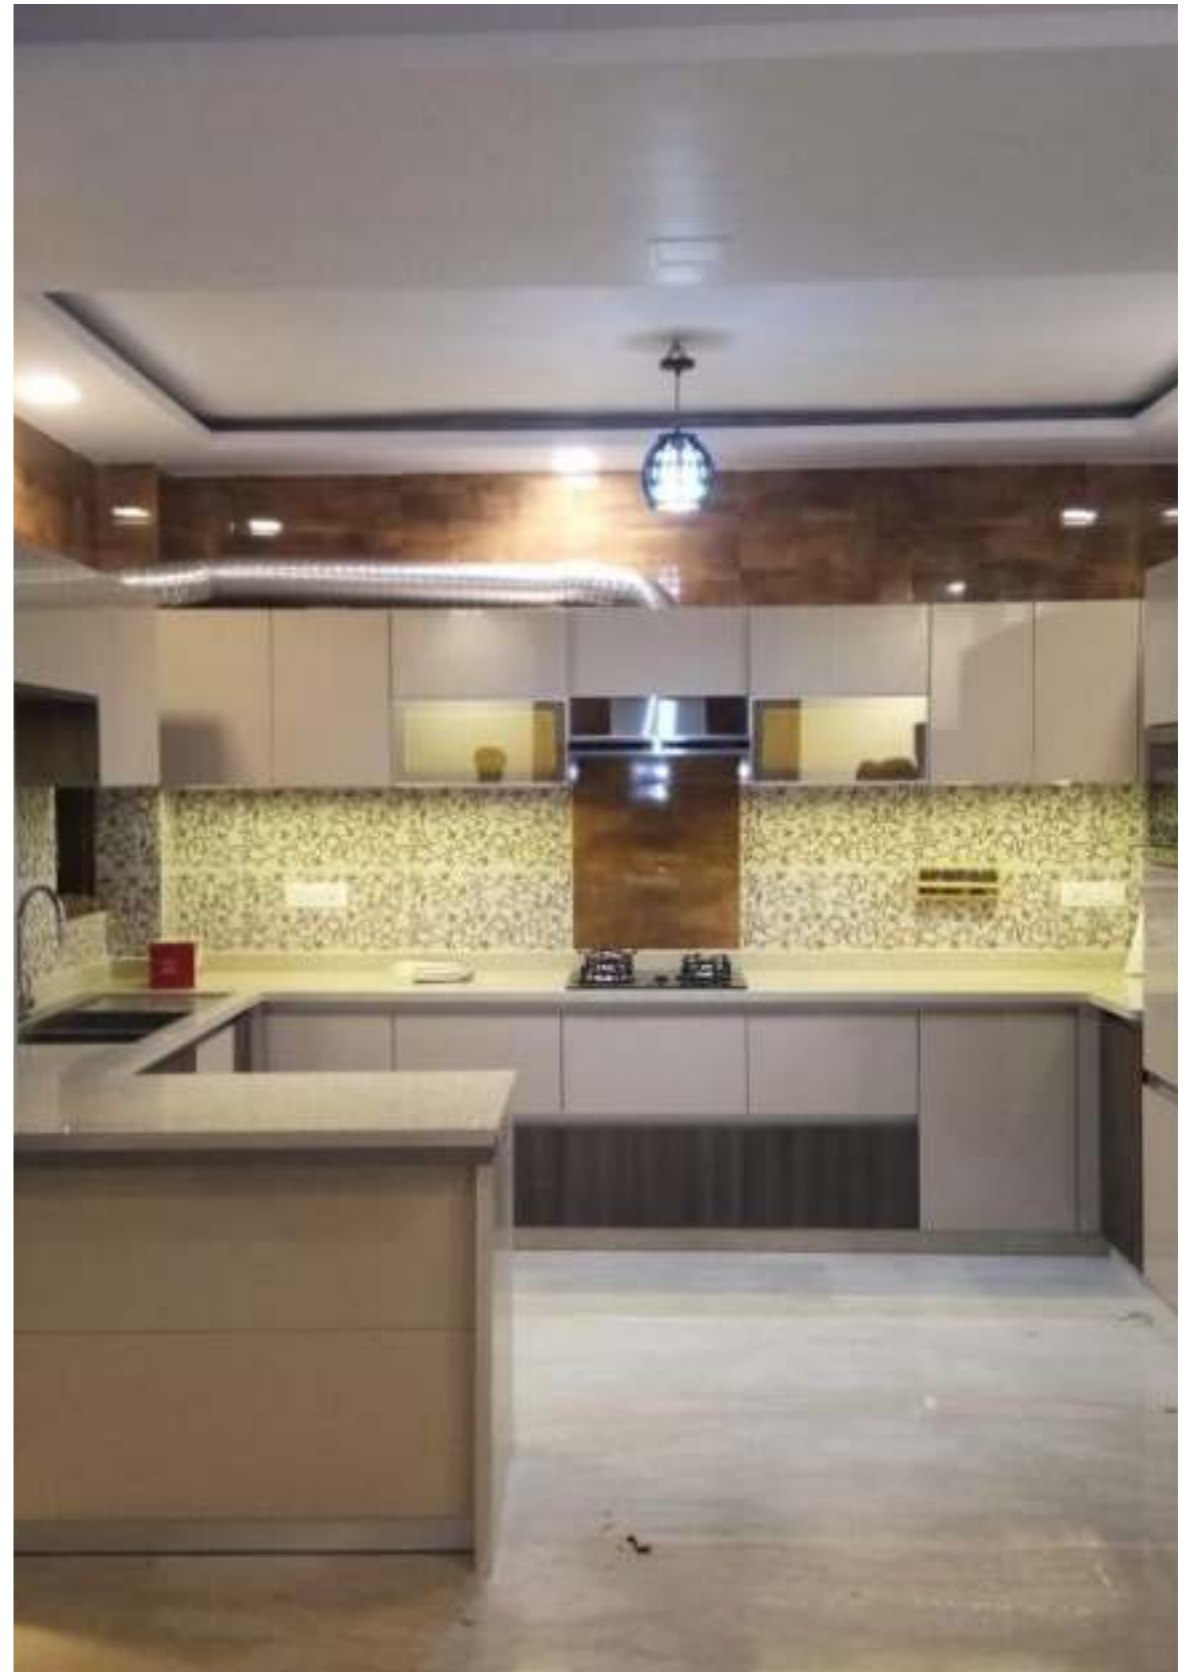

## G-Shaped

G-shaped modular kitchen is the hybrid version of U-shaped modular kitchen. Such kitchen provides extra space in the kitchen and hence is ideal for large families. Build as the shape of alphabet "G," it provides extra counters and storage space for special appliances like in-built refrigerator, deep fryer, barbeque, etc.

## Island

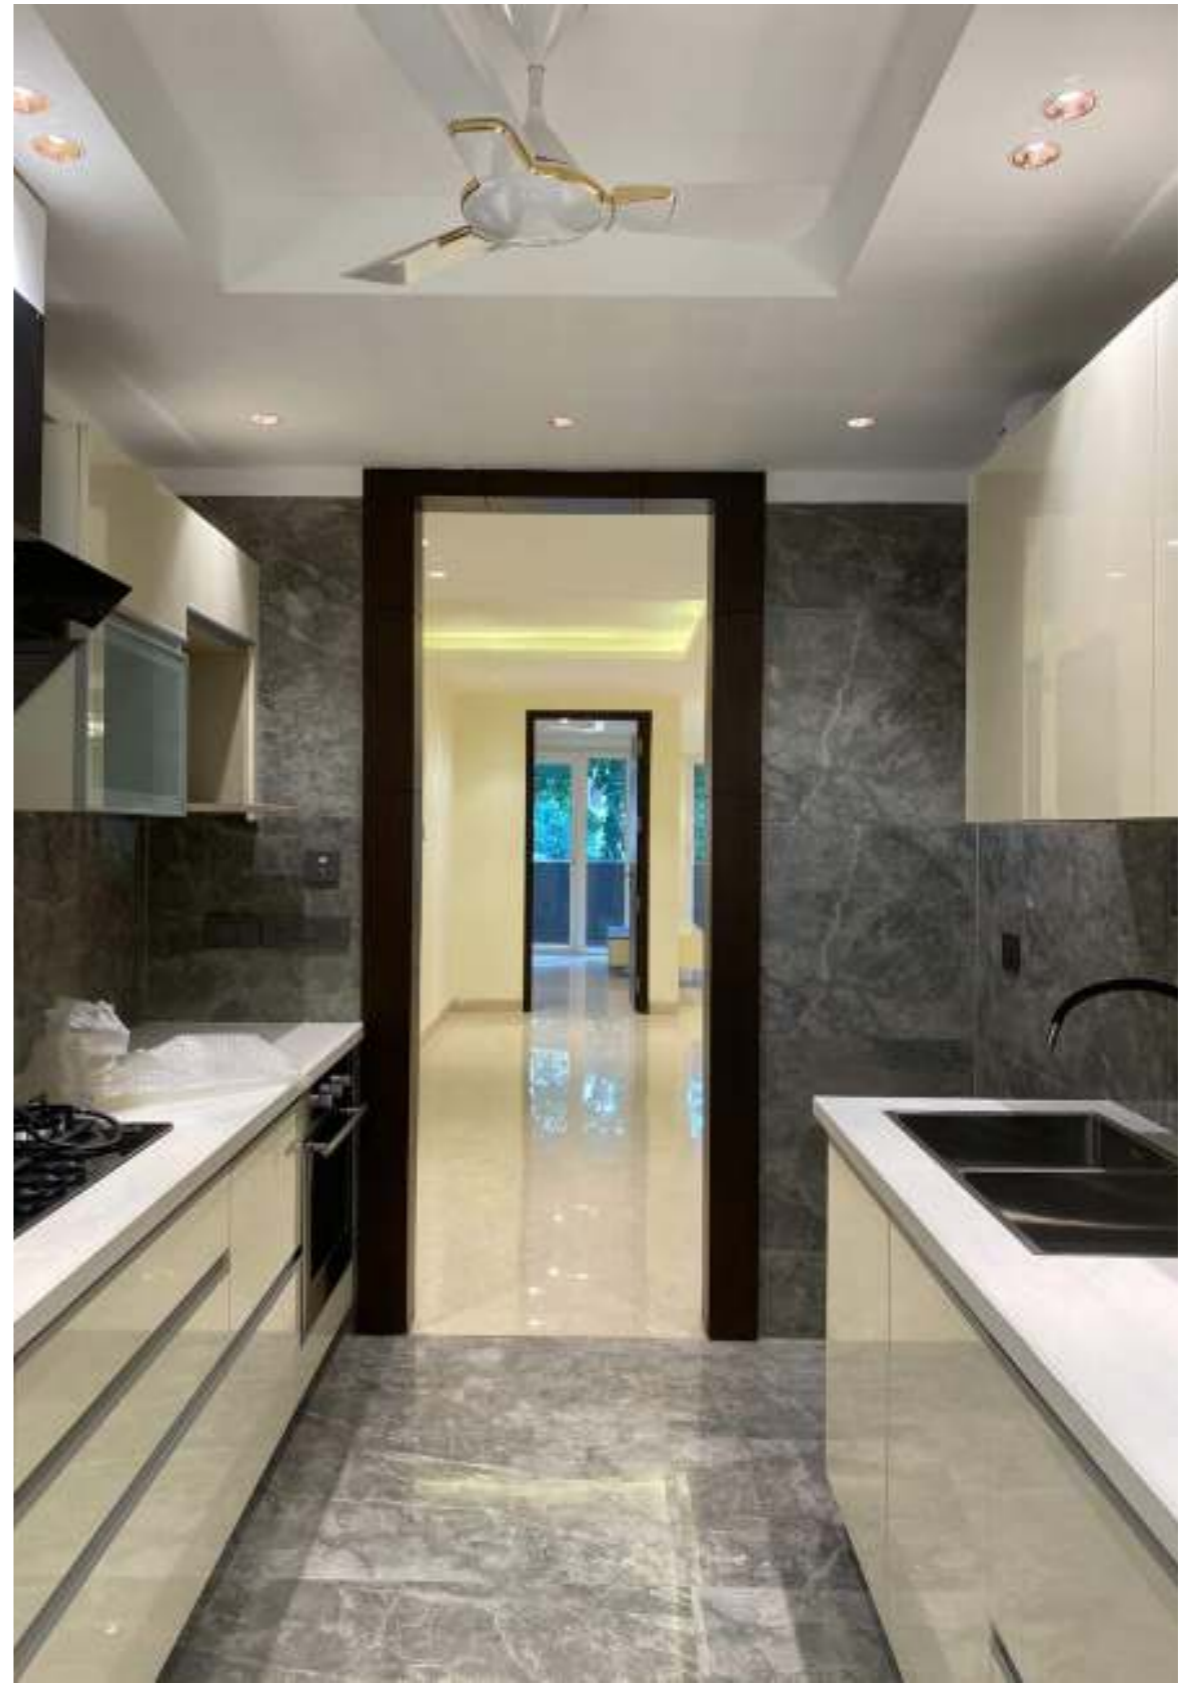

In island style modular kitchen, the island is the central focal point of the kitchen. It solves the dual purpose of having an attractive appeal and adding more counter space. You can also add a second oven, sink or dishwasher to your island in order to expand the functionality of the kitchen.

## Parallel

Parallel or gallery modular kitchen is ideal for kitchen with less available space as it uses one wall for work area like for sink, worktop and oven and other wall for storage. Such modular kitchen ensures that there is no inconvenience of movement and cooking in the kitchen.

## Inline

Inline Kitchen is also known as single wall or one-wall kitchen and is useful for smaller available space. Reaching the overhead cabinets becomes very convenient and space efficient in such kitchens. Larger appliances are smartly placed under the bench top in order to create as much space as possible so that the kitchen looks spacious.

## Breakfast Counter

A breakfast counter that's higher than the kitchen counter is more formal. If you choose to have one at the same height, it adds an informal touch and looks like an extension of the kitchen counter itself.

Opting for a built-in wardrobe offers you an immense amount of flexibility when it comes to choosing colors, finishes and door types.

## Wardrobe Collections

## Straight Line

Wardrobe with sufficient storage space. Perfectly aligned for people who live in flats to make the most of the space that they have. The warmth this wardrobe gives to your bedroom truly signifies your persona.

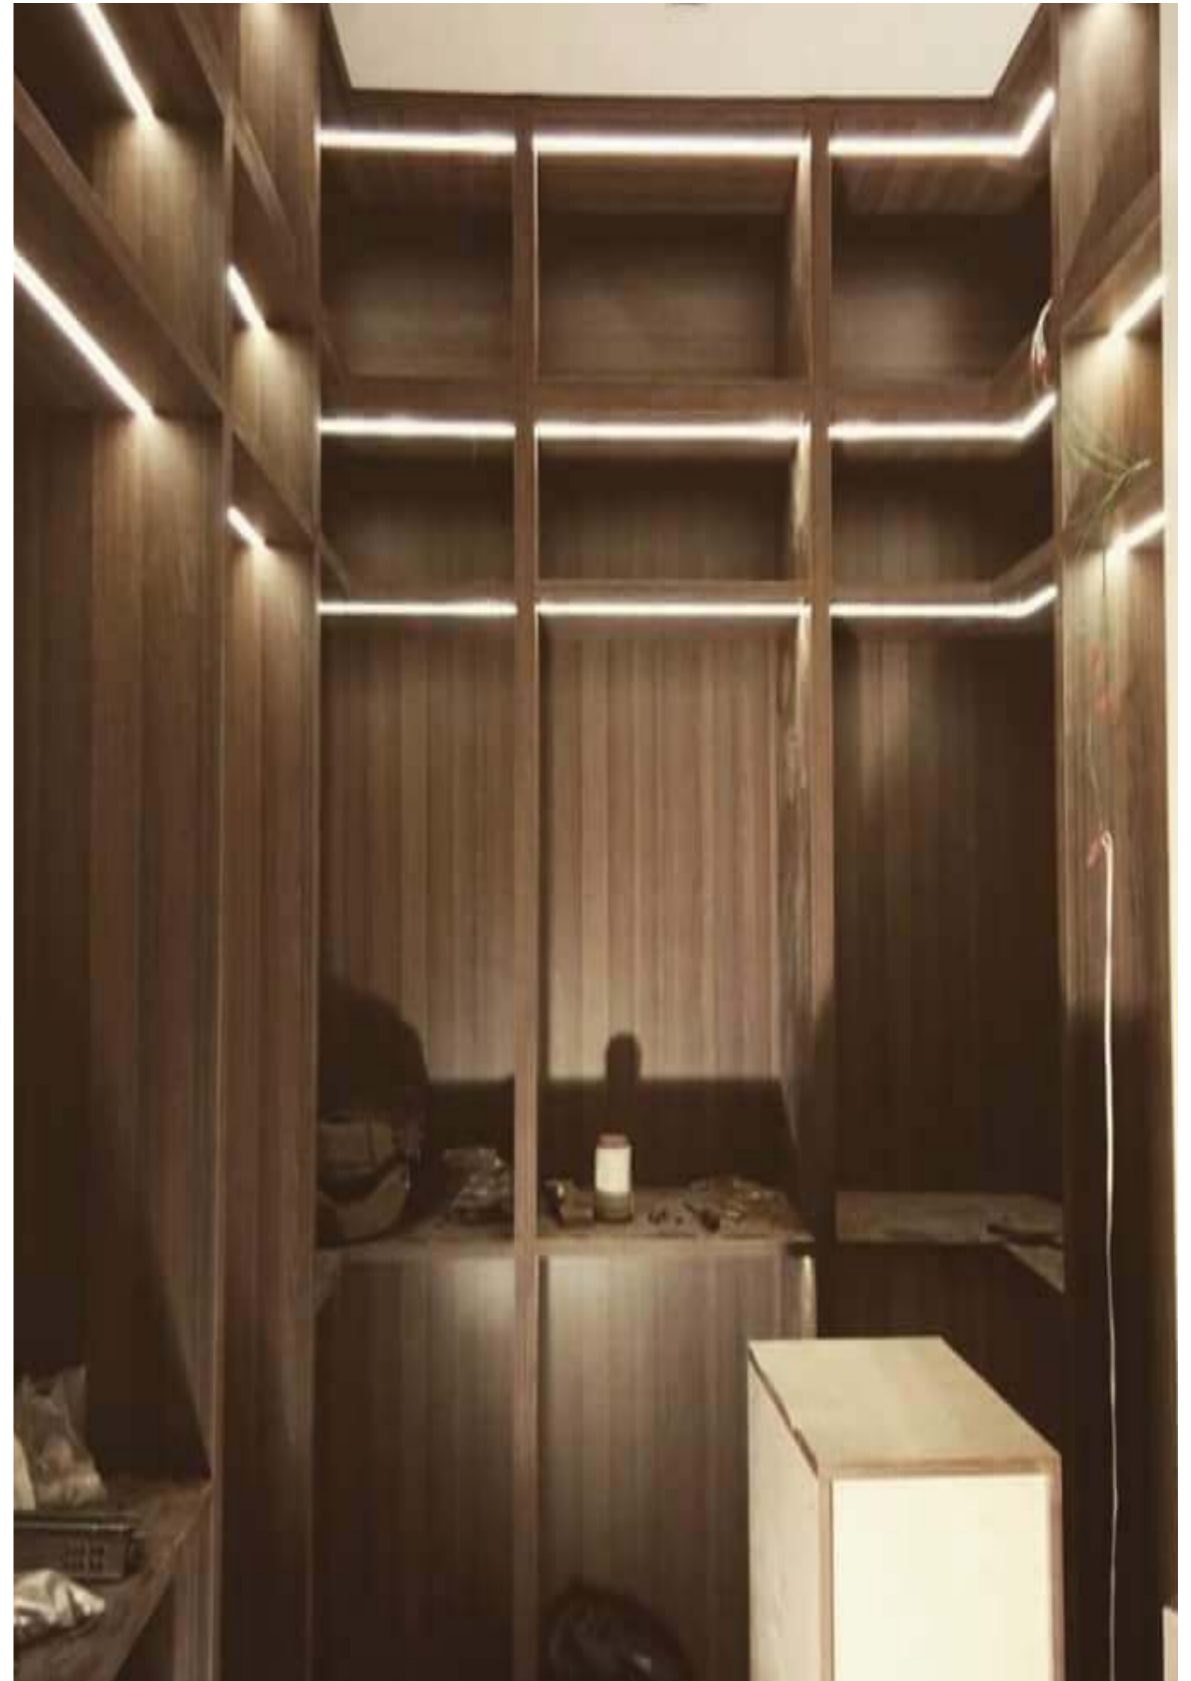

## Walking closet

A walk in wardrobe is an aspirational aspect of home design—especially when it is one that is spacious, well organised and kitted out with a closet system that is as stylish as the clothing collection it holds. It creates a focal point. If you have the space to hang statement lighting inside your walk in wardrobe, then a large ring pendant will create an impressive and practical circle of illumination.

## L-shaped

L-Shaped can be the ideal solution for the maximum utilization of a bedroom corner. They utilise the corners of the room which generally are otherwise wasted space. The sliding doors (most preferred door style) for such fitted L-shaped wardrobe provides great style as well as storage potential, making it a popular choice.

With study table

With work from home becoming a reality, most people are scrambling to set up a home office complete with a study table and chair. The laziness that accompanies working from a couch is another reason why people working from home need a sturdy study table with chair. We offer everything from study tables and chairs to study sets and more home office furniture.

A well-planned modular kitchen is all about large amount of storage created in a small space

## Storage Collections

## Console

Wooden console tables are the sidekicks to the sofa and couches of your living room. Whether it's about arranging your family pictures or keeping the essentials, console table adds an oomph factor to the home space. Console table adds a right amount of decorative flair and functionality, and accentuates the aesthetic appeal of entire home.

## Bar

Stylish, elegant, fully stockable, and functional for your smaller home or apartment, there is no reason you shouldn't have your own bar cabinet. These small bar cabinets for home are perfect for folk who enjoy having friends over for a nice glass of the good stuff and want to have an eye-catching medium to serve it from.

## Crockery

The crockery unit is an interior space that reflects a lot about the homeowners. The display tableware and dinnerware in an organized fashion affect warmth, welcoming comfort in the space. It is a decorative piece of furniture that cherishes the dining area and the kitchen area.

## Vanity

A storage solution to organize your hair care appliances, plus room for your daily hair care products. Store your bathroom items with style using the style selections vanity storage unit. This storage unit is designed to glide out of your bathroom vanity so you can reach your bathroom necessities with ease.

## Dresser

Dresser is short storage furniture, which has a number of drawers for providing organised storage. Wooden mirrored dressers are good for storing a number of items including clothing, bedding, accessories, and documents. Along with the great number of drawers, the top of the wooden dressers offers a counter-top for several purposes.

## TV Panel

A tv console is the perfect way to enrich your entertainment experience. Plus, by providing ample storage for your media essentials and a solution to stash away unsightly clutter, the right entertainment unit can also give your decor an extra injection of cleanliness and style. So, sit back, relax, and enjoy the show!
